

Description of at-risk funding plans

Friendship allocates its at-risk funding to bolster students' academic and social-emotional development, offering enrichment and remediation opportunities in line with our mission. The funding supports necessary staffing and supplies essential for implementing strategies and programs designed to guarantee the success of this targeted population.

- Counselors, Deans, Pathways Coordinators, and Student Support Teams are available to support the culture of our schools as well as the social emotional needs of our most vulnerable students.
- Friendship has implemented our World Class Education model by hiring music, art, dance and world language teachers across all campuses. This investment provides cultural engagement opportunities in fine arts programming and enrichment activities that broadens their scope of the world around them.
- Summer learning experiences and remediation at no cost, allows for credit recovery and intervention to prevent summer learning loss and enrichment programs to prepare students for college and career.
